ISHYIGA POS SYSTEM GUIDE

ALGORITHM IN LTD | Kigali - Rwanda

INTRODUCTION

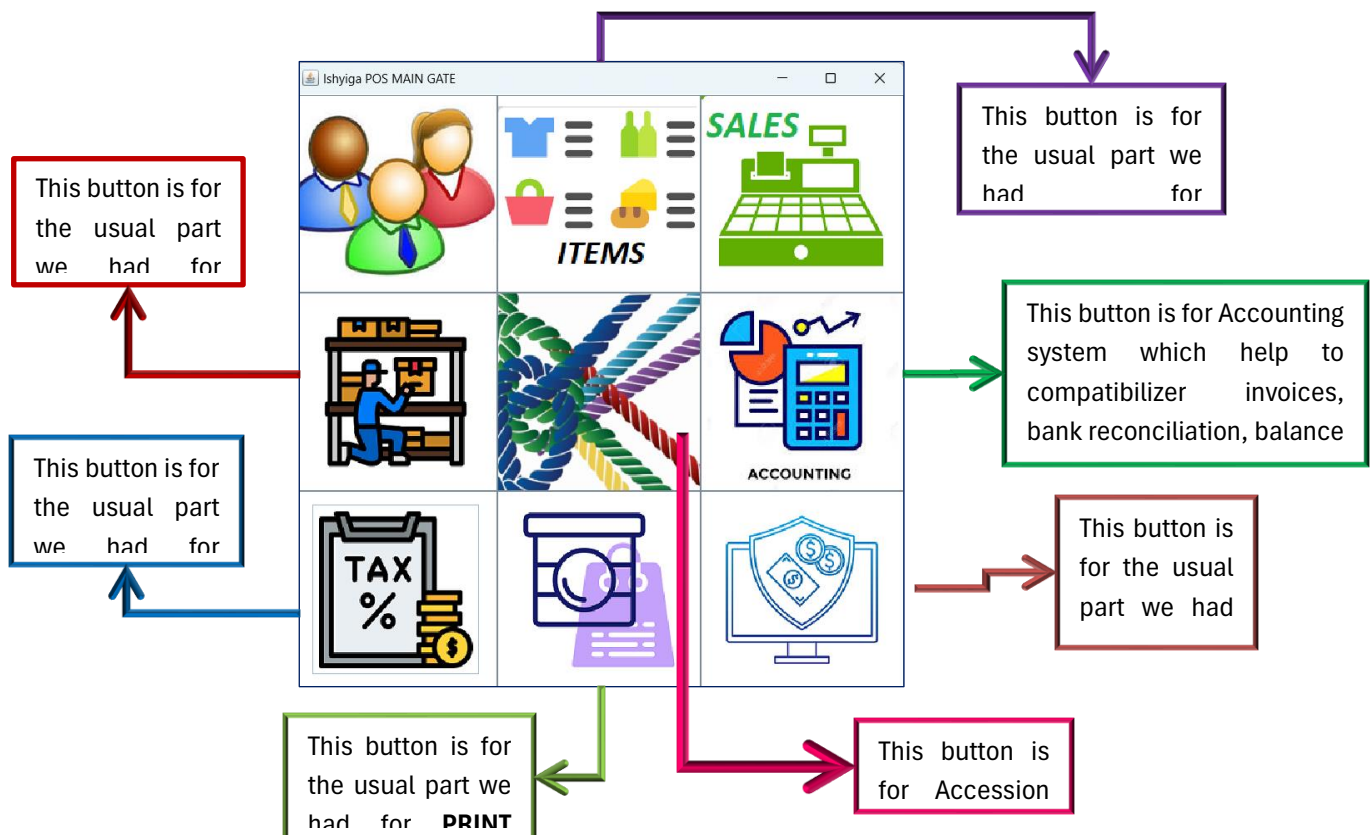

ISHYIGA POS is developed for optimal management of a retail stock, sales and automated refilling, taxes (Revenue Authority Certified Invoices) such as Supermarket, pharmacy, shops, beauty shops, gas stations, bars and other businesses that might need a stock management system. The main aim of POS is to have stock management in which all the information regarding the stock of the organization will be presented. It also contains the report of the company's profile, sales details, purchases details and the remaining stock.

ISHYIGA POS is consisted of 2 parts:

- POS CMD for retail stock management.
- POS CAISE for selling items.

POS MAINGATE

Description: with retailers, to use ISHYIGA SYSTEM required to open three or four or five different applications depending on the business sector. It includes, **VSDC/EBM, SALE/VENTE, STOCK, PRINT PHARMA & VCDC**. With the update made, all application is contained within one application called **MAINGATE** and it is displayed as follow:

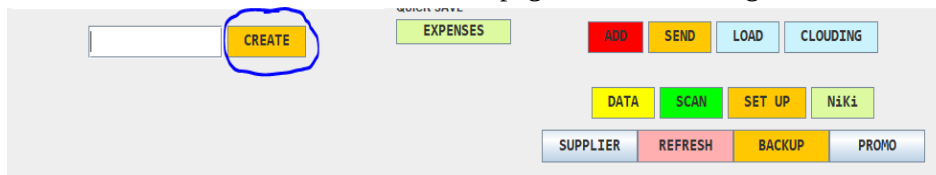

POS CMD

ISHYIGA POS CMD (stock) was developed for management of retail stock used by stock managers in different actions. It will be used for stock management, checking of the batch number of the items, send commands (orders), suppliers report, transfer and many other functions

The 'PRICE' button is labeled with a red '3' and the 'SELLING PRICE' modal is labeled with a blue '4'.

REDUCTION

REDUCTION is used to moderate selling price for someone in a given period of time.

STEPS

1. Select item → click SELL → click REDUCTION button (on top of basket) change price.

The screenshot shows the POS interface with the 'SELL' button highlighted in blue. A list of items is displayed on the left, including 'BLUE BAND 250 GR', 'CHEETAH PET 30CL', 'COCA COLA 50CL', etc. The right side shows a grid of items with prices and quantities. At the bottom right, the total is 1,500.00 RWF. The 'REDUCTION' button is highlighted in green at the top right of the basket area. A small dialog box is visible in the center with the text '1200.015 LESS THAN 1200.0' and 'Yes'/'No' buttons.

DATA

DATA is a button visible to the homepage of ISHYIGA POS CAISSE used to visualize different reports. It consists of different buttons when you click on it such as:

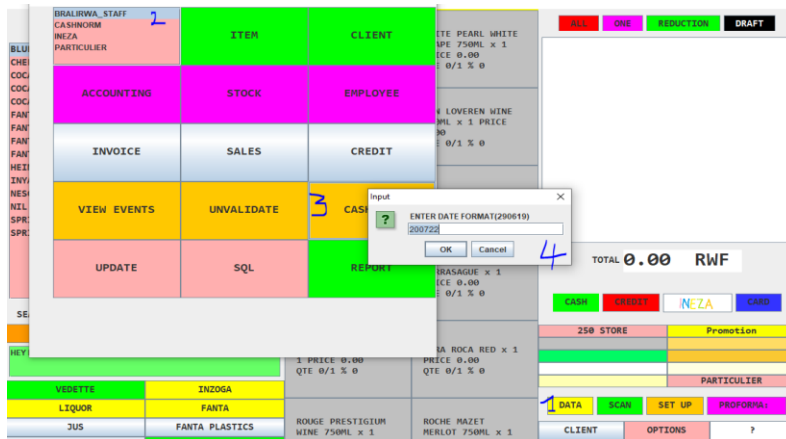

The screenshot shows the 'DATA' menu open, displaying a grid of options: ACCOUNTING, STOCK, EMPLOYEE, INVOICE, SALES, CREDIT, VIEW EVENTS, UNVALIDATE, CASHDESK, UPDATE, SQL, and REPORT. The 'DATA' button is highlighted in blue at the bottom left of the menu. The background shows the same POS interface as the previous screenshot, with the total now at 0.00 RWF.

CASHDESK

CASHDESK is another feature presented in ISHYIGA sales, used once you want to know the total amount presented into the caisse and show the sales total amount of each employee.

STEPS

1. Click DATA → click CASHDESK button → select DAILY ALL (Journalier) → enter date (for your choice) → press OK.

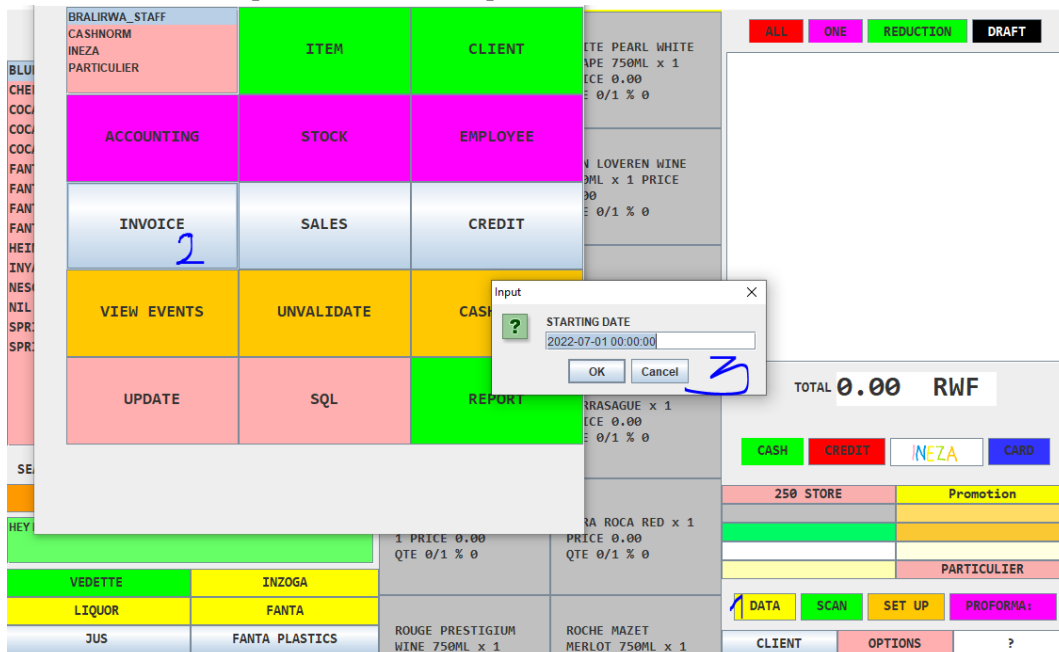

INVOICE

INVOICE helps to show list of invoices performed in a specified period.

STEPS

1. Click DATA → click INVOICE button → select NET INVOICE → select ALL → select date interval → input date interval → press OK.

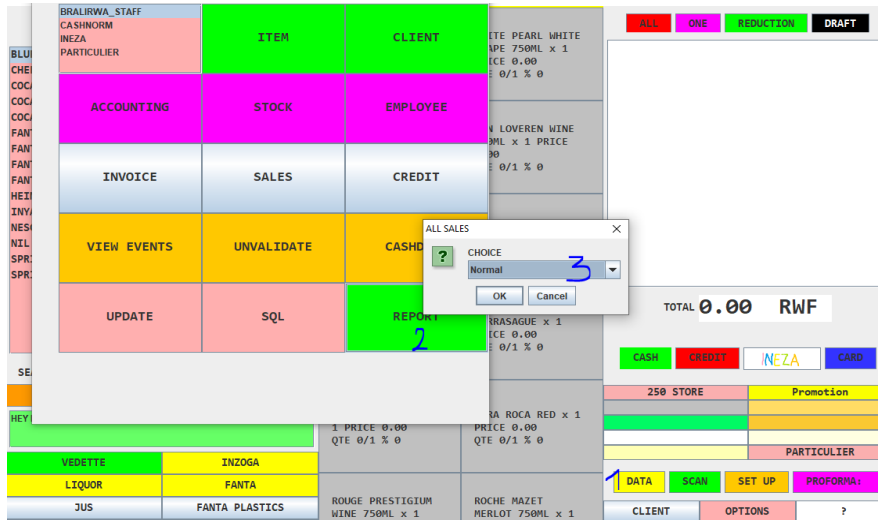

REPORT

REPORT helps to show all sales reports including selling and purchase value.

STEPS

1. Click DATA → click REPORT button → select ALL SALES → press YES → enter date interval → select ALL → OK.

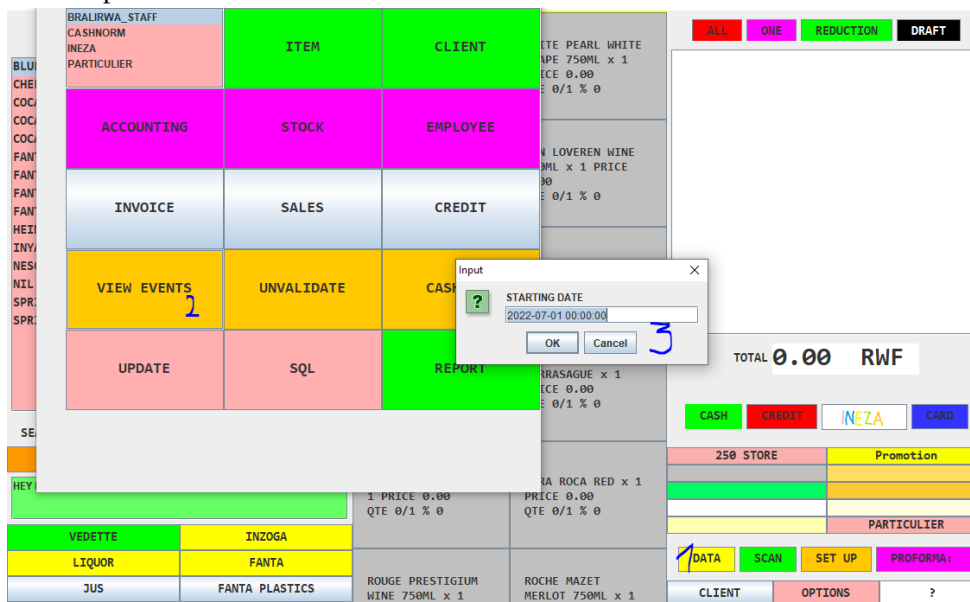

VIEW EVENT

VIEW EVENT is used to show all events and changes made (movement out of items, price changes, refund etc.,

STEPS

1. Click DATA → click VIEW EVENT button → select changements(change) → enter date interval → press OK.

EMPLOYEE

EMPLOYEE is used to create or update employees.

STEPS

1. Click DATA → click EMPLOYEE → press YES (for new) or NO (for update) → fulfill form and select permission (to his/her) → click SEND (ENVOYER).

STOCK

STOCK helps to know the quantity of products in stock.

STEPS

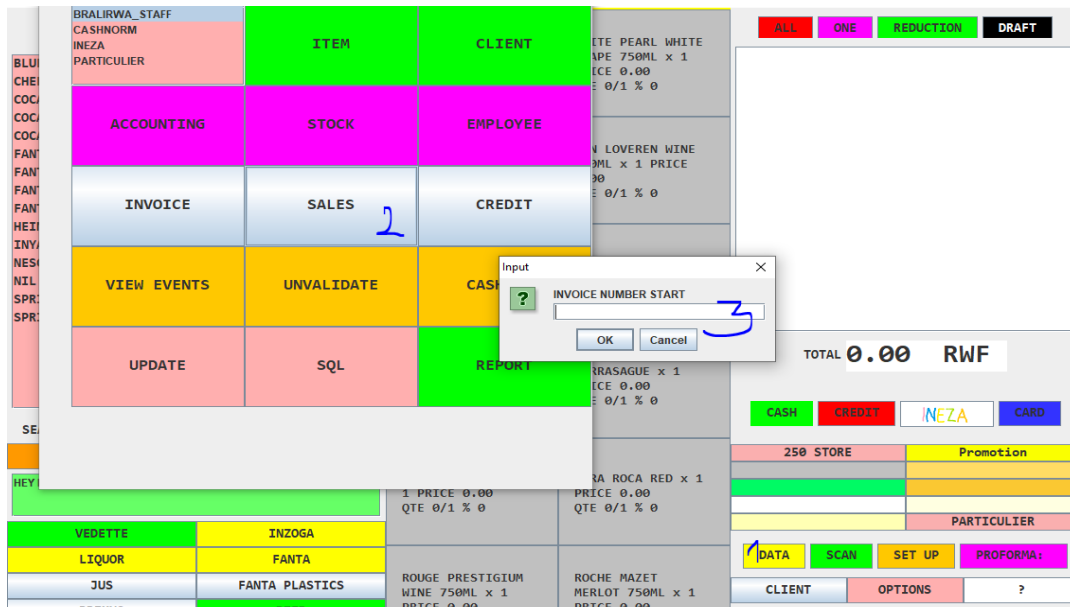

1. Click DATA → click STOCK button.

SALES

INVOICE helps to visualize invoices report sorted by number.

STEPS

1. Click DATA→ click SALES button→ enter invoice number started →enter invoice number ended.

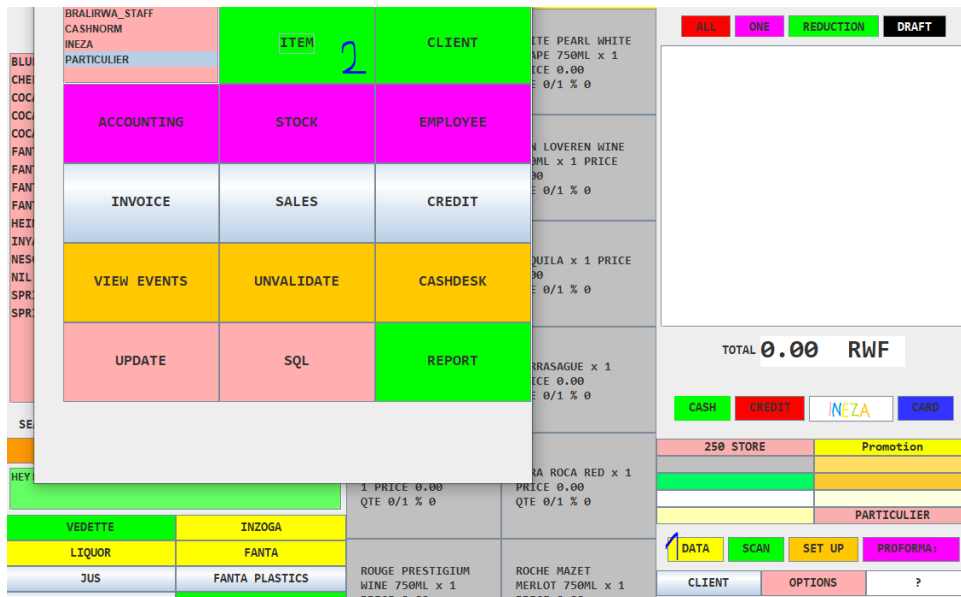

ITEMS

ITEM helps to see product reports.

STEPS

1. Click DATA→ click ITEM button.

CLIENTS

CLIENT is used to visualize client details.

STEPS

1. Click DATA→ select company name→ click CLIENT button.

The screenshot displays the ISHYIGA SOFTWARE interface. On the left, a vertical menu lists various options including BLU, CHE, COC, COC, COC, FAN, FAN, FAN, HEI, INV, NES, NIL, SPR, and SPR. The main area shows a grid of buttons for different functions: ACCOUNTING, STOCK, EMPLOYEE, INVOICE, SALES, CREDIT, VIEW EVENTS, UNVALIDATE, CASHDESK, UPDATE, SQL, and REPORT. A 'CLIENT' button is highlighted in green. To the right, a list of clients is visible, including items like PEARL WHITE, LOVEREN WINE, and ROCA RED. The bottom right corner shows a 'TOTAL 0.00 RWF' and a 'DATA' button.

NIKI WEB

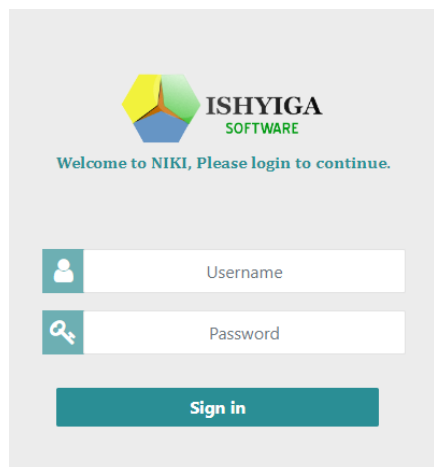

ISHYIGA NIKI is a unified item master data and a nomenclature management system **NIKI (National Items K Index)** was created to give a better way of analysing items transactions. NIKI purpose is to insure that created items with their categories and synchronized in all the system in same format with unique code for each product across regions.

STEPS

Through these steps, user will be able to access NIKI webpage, Sign in with the provided credentials, view list of pending items which needs to be validated, proceeding with item validation then validate the items which will be pulled in the POS CMD as it was described above.

Accessing NIKI WEBPAGE

1. Open browser → use this link <https://ishyiga.com/NIKI/niki.jsp> → click Login button → Enter username & Password → Click Sign In

Temporary Items

2. After logging in NIKI the below image is the landing page. It has buttons which perform different tasks and will be explained more. With the TRANSFORM button it contains all items which are **pending** and need to be validated.

STEPS

3. Click Transform button

Item Validation

With the displayed list, user need to select item to validated with the below steps

STEPS

1. Click Validate button

Temporary Item search form

KAOS PLATFORM

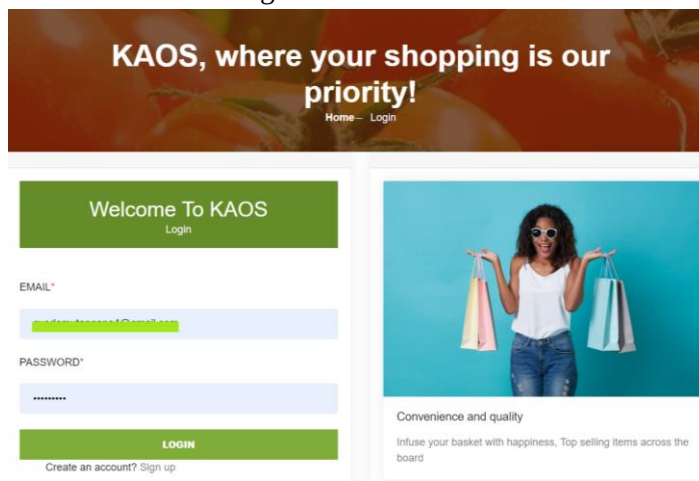

ISHYIGA KAOS operates through an e-commerce platform, enabling retailers to place orders for products, which are then transmitted to wholesalers responsible for fulfillment. Retailers access the platform to browse products or map the orders from the local system to place orders, and provide shipping information, while wholesalers receive these orders, pick items from inventory.

STEPS

Through these steps, user will be able to access KAOS PLATFORM, Sign in with the provided credentials, view list of orders, bargain, Checkout, place order which will later be received by seller and served.

Accessing KAOS PLATFORM

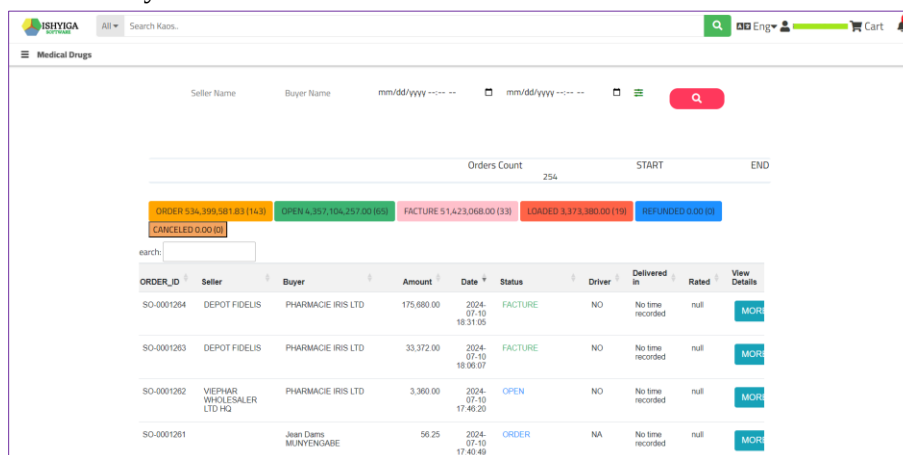

1. Open browser → use this link <https://ishyiga.com/> → click Login button → Enter username & Password → Click Sign In

The login page features a header with the text "KAOS, where your shopping is our priority!" and links for "Home" and "Login". Below this is a "Welcome To KAOS" section with a "Login" button. The main form includes fields for "EMAIL*" and "PASSWORD*", both with placeholder text. A "LOGIN" button is positioned below the password field. A link "Create an account? Sign up" is located at the bottom of the form. To the right of the form is a promotional image of a woman holding shopping bags, with the text "Convenience and quality" and "Infuse your basket with happiness, Top selling items across the board".

Check Pushed orders

2. Menu → My orders

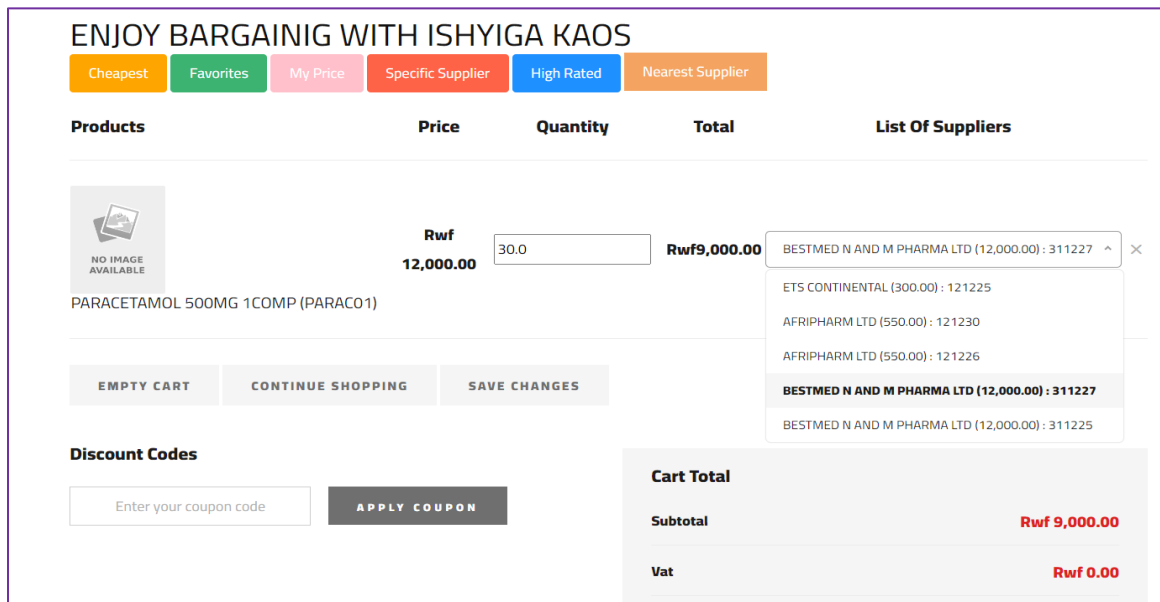

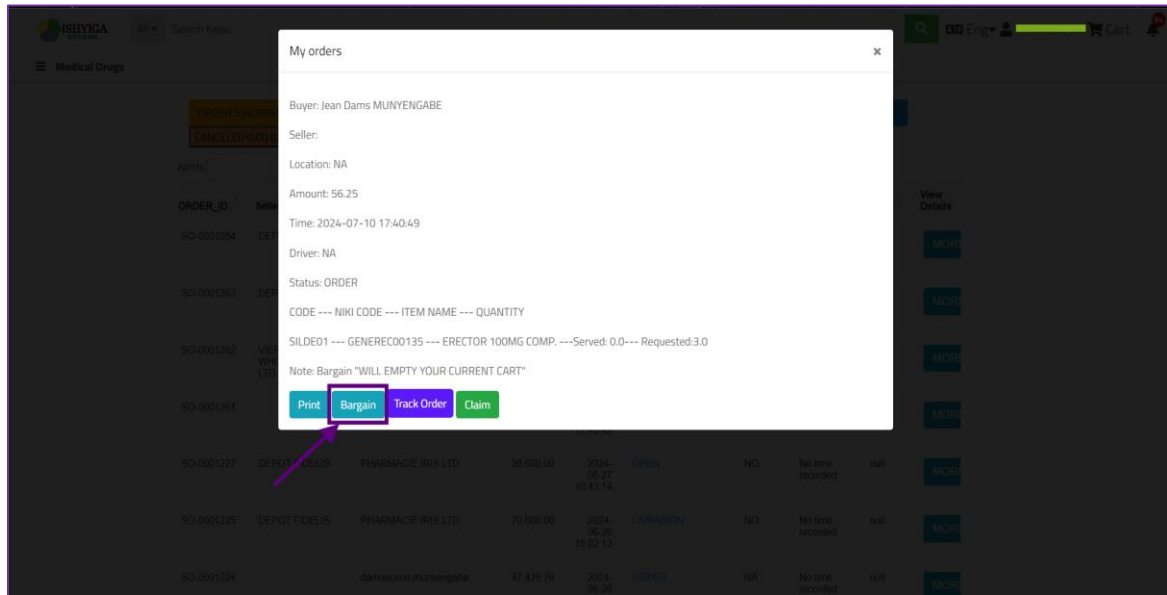

The "My Orders" page displays a summary of orders with filters for "Seller Name" and "Buyer Name". It shows a total of 254 orders. A summary bar includes buttons for "ORDER 5,34,399,581.83 (14)", "OPEN 6,392,106,257.00 (6)", "FACTURE 5,142,068.00 (3)", "LOADED 3,373,380.00 (19)", and "REFUNDED 0.00 (0)". Below this is a search bar and a table of orders.

Bargaining orders

1. Click more on the order to bargain → click bargain button
2. Bargaining refers to the negotiation process conducted over digital platforms between buyers and sellers to reach a mutually agreeable price for a product or service. With KAOS, bargain happens over the item name pushed from different wholesalers on a certain price and buyers choose accordingly

Check Out

1. After the bargaining process and mapping the product to the suppliers, the user proceed with checkout. Checkout contain the company information filled upon the registration of an account and fill in the payment methods to place order
