

VCIS (VIRTUAL CERTIFIED INVOICING SYSTEM) USER GUIDE

I.INTRODUCTION

VCIS is used in stock and sales management alongside VSDC (Virtual Sales Data Controller) to make a complete e-VAT system with the purpose of certifying receipt and report every transaction to GRA back office. On the other side, Taxpayer monitor and maintain stock of products and sales with the ability of generating important reports in the organization.

II.STOCK

Stock module is used in stock management by ordering, purchasing, tracking and controlling inventory.

1. creation of item

Before using system, you have to create your items in the system

Steps:

1.click on create item button and Type Name Then press OK

COST PRICE 300

SALE PRICE 500

COMMIT ADD

- By Batch: This means the item will expire
- By Series: This means the item doesn't have an expiration date, like wine
- Sleep: means the item you don't want to sell at that time.

Scan Bar code or type in code bar field-> select among available options on stock tracking->set item status >set vat depending on item tax class>set item family >enter default cost price and default selling price > then click add to confirm item creation.

You have successfully created your first item

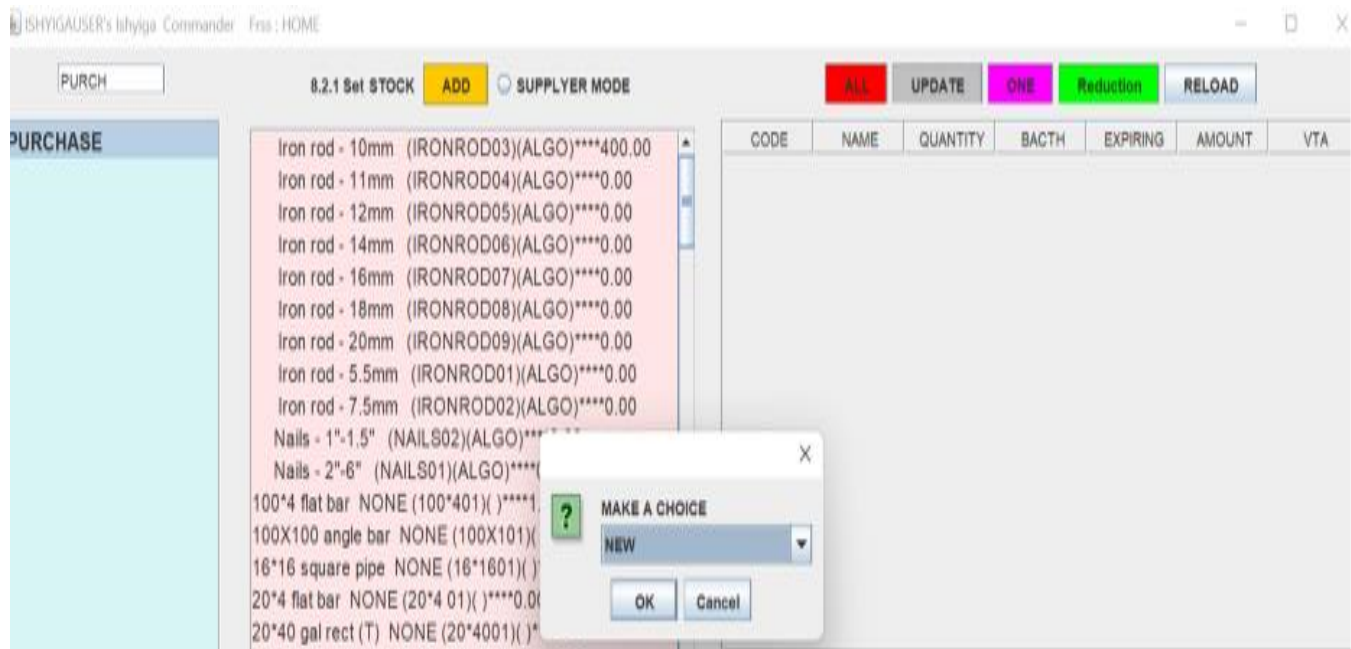

2. Purchase

Purchase button used to make entry of purchased items from supplier.

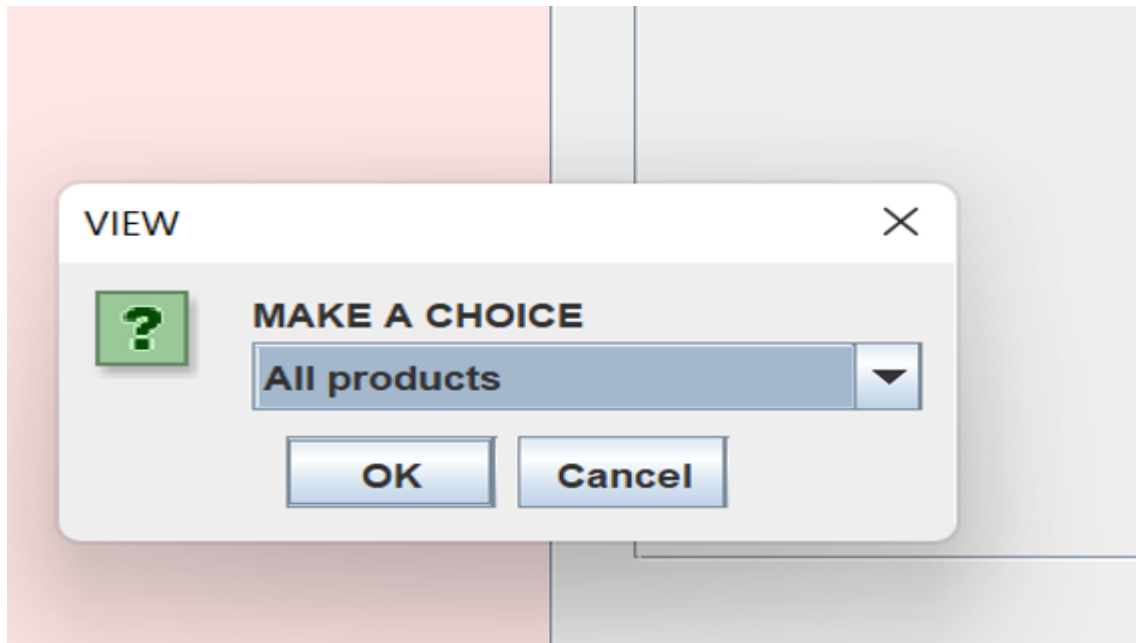

Steps:

1.To start making purchase, click on purchase button and make your choice to be new then

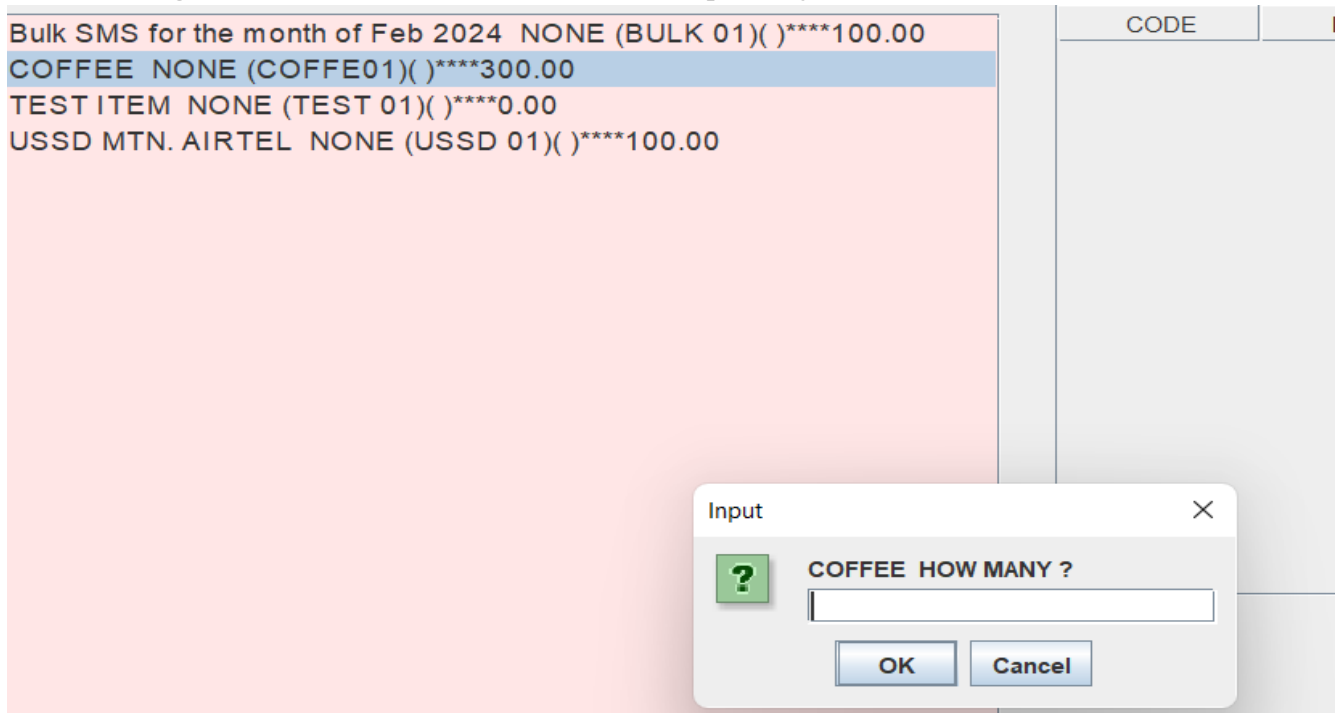

- It is required to put the supplier's name. If it does not exist, create a supplier name

3. Select the view of your items depending on your choice

4. Select a given item ->click add-> Enter the quantity

->Enter cost price ->enter batch number->enter expiry date and your item will be place on right side in basket. Now click on **direct** button and confirm supplier.

8.4.1 WHALE STOCK **ADD** ☐ SUPPLIER MODE

The first step is to create a client who is a consumer of our goods or services Here is the steps to create a client.

From sales window home group, click on client button in the left side of the window and choose new.

The screenshot shows the ISHYGAUSER application interface. On the left, there is a sidebar with a 'CLIENT' button highlighted. The main window displays a list of items with their prices in ZMW. A 'CLIENT' dialog box is open in the center, showing an 'OPTIONS' dropdown menu with 'NEW' selected. The dialog has 'OK' and 'Cancel' buttons. The bottom right of the main window shows 'TOTAL COST 0.0 ZMW'.

Click to continue and fill well all the information requested in the form below

The screenshot shows the 'REGISTER A NEW CLIENT' form in the ISHYGAUSER application. The form contains the following fields and values:

UNI CODE :	3536
CLIENT SURNAME :	
CLIENT FIRST NAME :	
PERCENTAGE(%) :	100
REDUCTION :	
EXPIRATION DATE :	311225
ACCOUNT :	GROSSISTE
COMPANY :	PARTENAIRE
PHONE / ADRESSE :	
STATUS :	OK
TAX NUMBER :	SOMMEIL
CREDIT LIMIT :	
DELAY LIMIT :	
EMAIL :	
DEVISE :	USD
V_WITH_HOLDING : % :	ZMW
	0

A 'SAVE' button is located on the right side of the form.

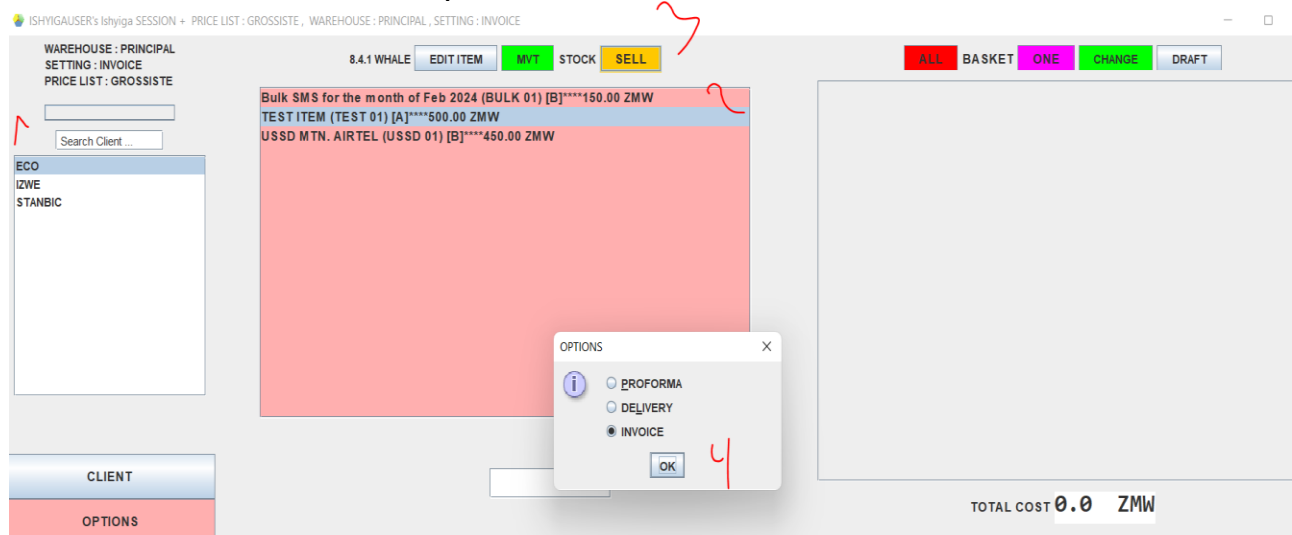

After filling the form, click send and if everything is well you will receive a confirmation message saying that client has been inserted in the system. Now, click Ok and you are done with client creation.

1. Invoice

Invoice is a record of transaction given by the seller to the buyer. To be accepted by the GRA, it must have an e-VAT signature in addition to normal invoice information like client's information, goods, quantity, prices, taxes calculations, and so on

Steps to make invoice:

1. select a client from client panel-> select item->click on sell->select invoice

- Enter needed quantity
- Confirm selling price, the item now will go to basket on right side and you can repeat the process by selecting item until you have all items client want to buy.
- Select either cash or credit, a new end sales panel will appear
- Review invoice settings like amount, discount and tax number
- Click save your invoice where it this button will turn green
- click yes to print. Look at the image below to see the all above steps.

THANK YOU
PRINTED BY ISHYIGA ERP 8.4.1 WHALE

Then once your invoice is printed, it will show the VAT information basically with date and time the receipts is issued, internal data and signature, machine registration code and receipt number.

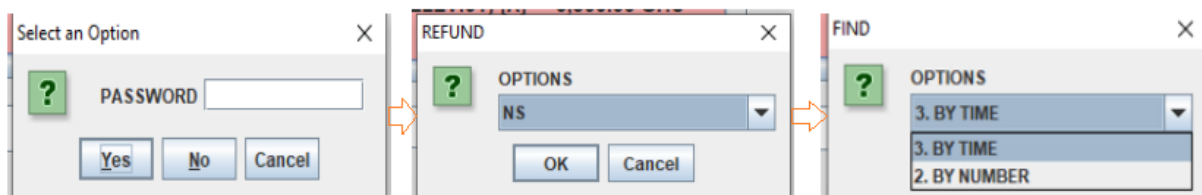

2. Refund

For a valid reason, an invoice can be canceled as a way of making negative sales so that the products return in their respective warehouse. To be accepted by the GRA, refund must have an e-VAT signature and is approved only for original sales receipt.

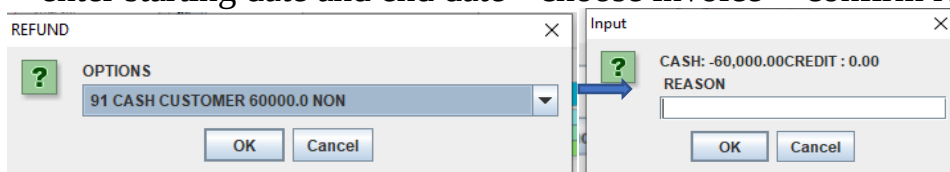

To make are successful refund , go to sales window->options->select refund->

->provide password for authentication->select NS-> select from available options->

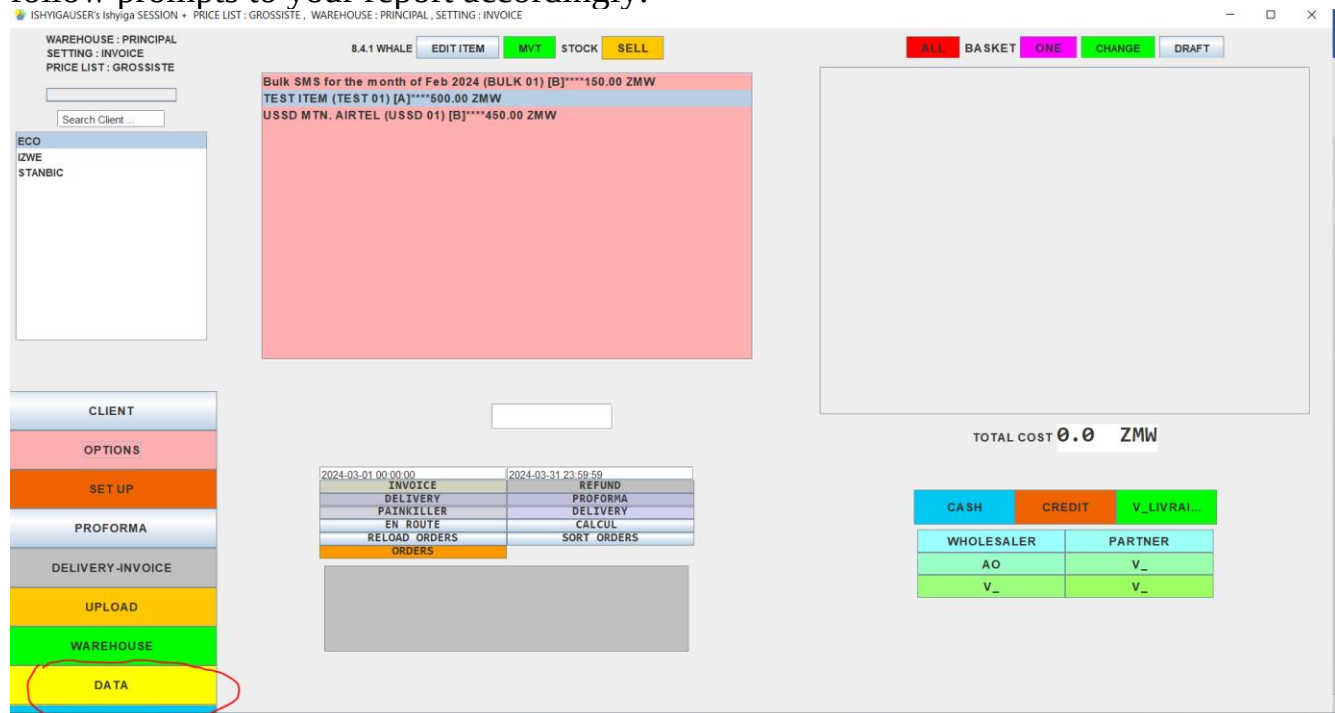

->enter starting date and end date->choose invoice ->confirm return->provide reason

After providing significant reason, click ok to continue->print option

3. Reports

To get different sales report from sales window, click on data button and choose any button to follow prompts to your report accordingly.

4. Zreport

ZREPORT is summary of daily transactions of a given company. It contains company information, sales, refunds, taxes among many others.

This is how you can print your ZReport.

Go to option,

select ZReport, select one of 3 options listed, set desired date then print
