

ISHYIGA MINI GUIDE

INTRODUCTION

ISHYIGA MINI is a simplified version of ISHYIGA POS (Point of Sales) which runs on mobile devices. It provides management features ranging from - but not limited to - items, stock, suppliers, clients, and account management, taxes accounting and tax authority certified invoices, and supply chain nodes.

WHY ISHYIGA MINI

- It's a standalone application (does not require another system to run)
- Makes lives easy in term of Intern, Power or Skills (understanding)
- Gives a Certified invoice and transactions reporting
- Fast set up and operation
- Supported by all android devices (phones, tablets and POS devices)
- Various reports
- Electronic supply chain (orders)

LOGIN

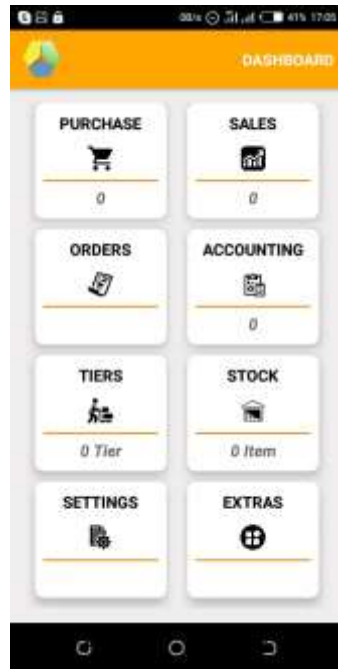

The first page to get upon starting the application is LOGIN PAGE where the page shows Client name, ID_CLIENT, Version of the APK and where to enter credentials in order to navigate through the application.

MAIN PAGE

The next step after logging in the system is the MAIN PAGE which contains more like a summary of all features the user will be navigating.

This main page contains: PURCHASES, SALES, ORDERS, ACCOUNTING, TIERS, STOCK, SETTINGS and EXTRA (additional)

SETTINGS

The SETTING section is where to set up different things within the system or what to be displayed on the invoices. An important feature to take to heart is how to change ID and PASSWORD in order to keep data safe.

STEPS

1. Login in the App → Main Page
2. Open SETTINGS button
3. Fill the form as follow and use ID and PASSWORD the user need

4. Click REGISTER

LOAD ITEMS

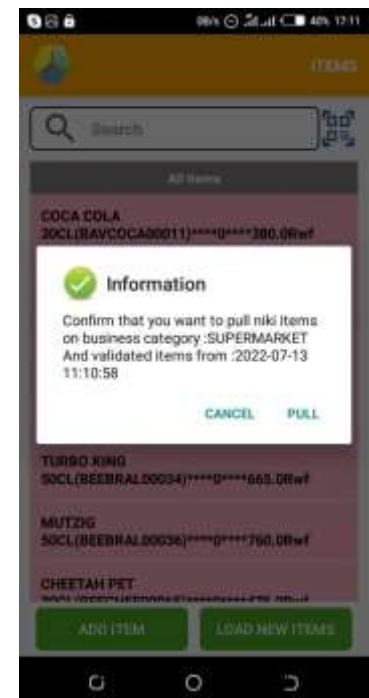

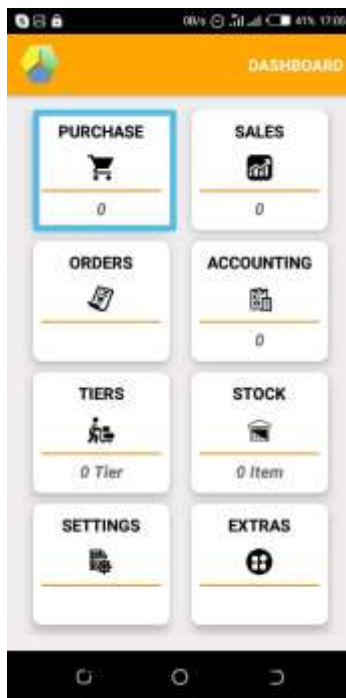

There is a system called NIKI (National K Index). It's a unified item master data and a nomenclature management system for this, it gives clients a better way of analyzing items transactions.

On NIKI there are different BUSINESS CATEGORIES, shops and markets are classified in SUPERMARKET so the items those businesses use are under that category.

In the purchase interface → ITEMS, there is a button LOAD NEW ITEMS once clicked on it, it pulls the validated items from NIKI and adds those in the system.

STEPS

1. Login in the App → Main Page
2. Open purchase button → purchase
3. Open Items button
4. Open LOAD NEW ITEMS and it will synchronize items from NIKI

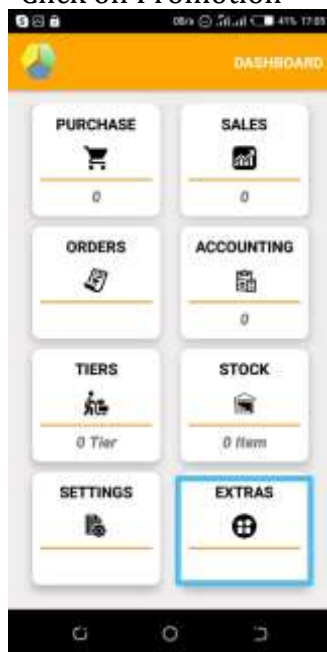

PULL PRICES

There are different suppliers who would like to have their products sold at the same price. For instance, Bralirwa, Inyange, Sina or any other supplier. There is a section on NIKI where we classify these items and give them prices according to the supplier's needs.

STEPS

1. Login in the App → Main Page

2. Open EXTRA button
3. Click on Promotion

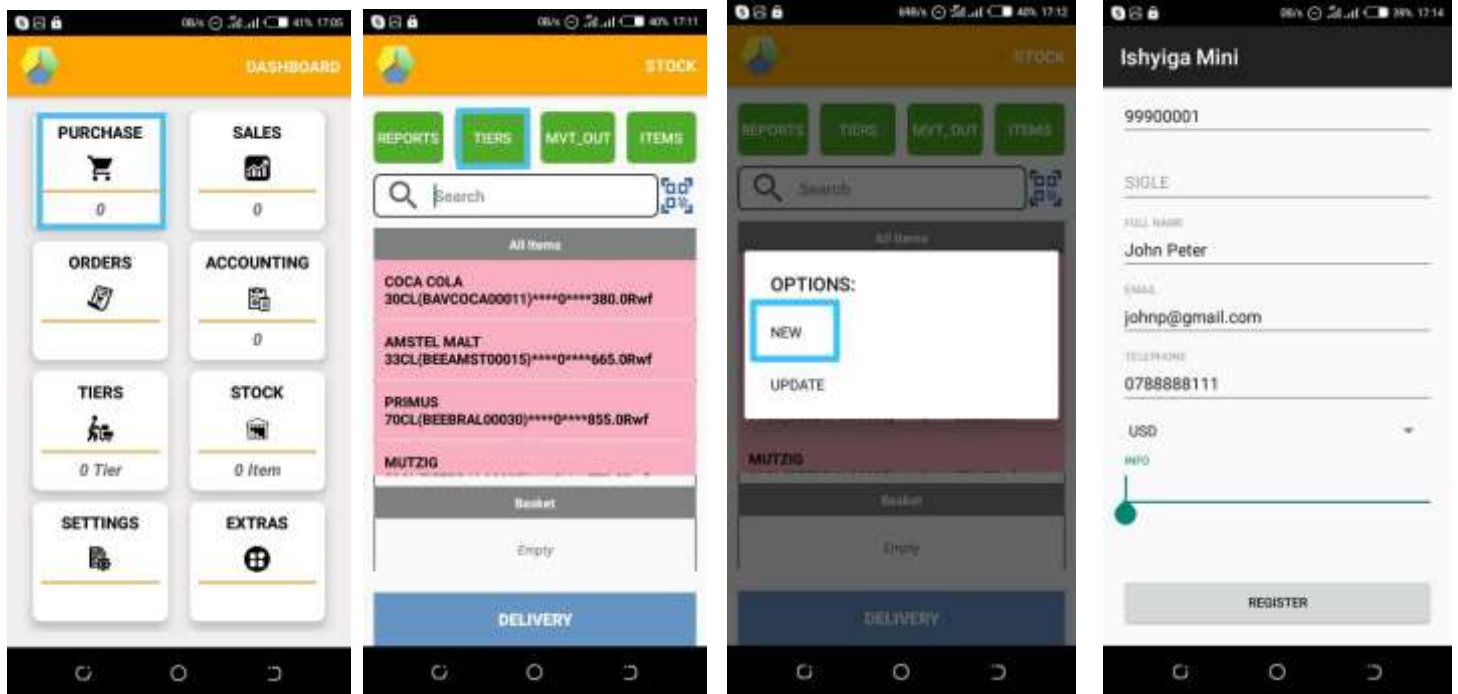

4. Choose which to load by suppliers

SUPPLIER/TIERS

In ISHYIGA MINI a supplier is needed in different operations such as making a DELIVERY or sending an ORDER. So, each time a client purchased goods in order to add the stock s/he has to add a supplier of those products. Below are the steps to create a new supplier

STEPS

1. Login in the App → Main Page
2. Open purchase button → purchase
3. Open TIER button
4. Fill the information as below
5. Click REGISTER to add a new Supplier

SCAN

There is an option of scanning items by their Barcode in case it was registered for that product. Either in Selling or Purchasing these options is available and it is represented by the below symbol:

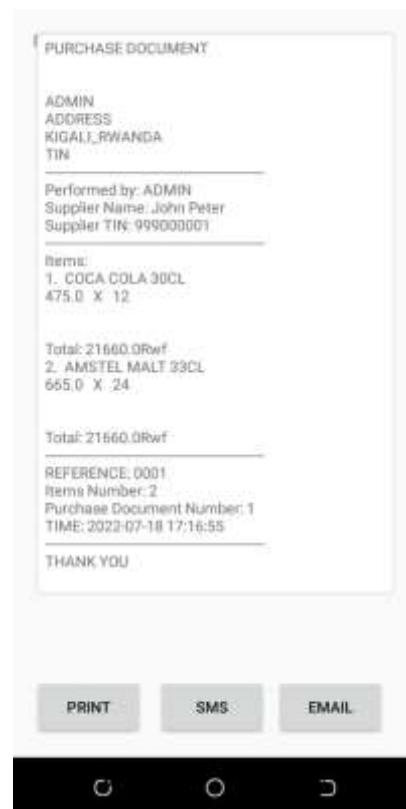

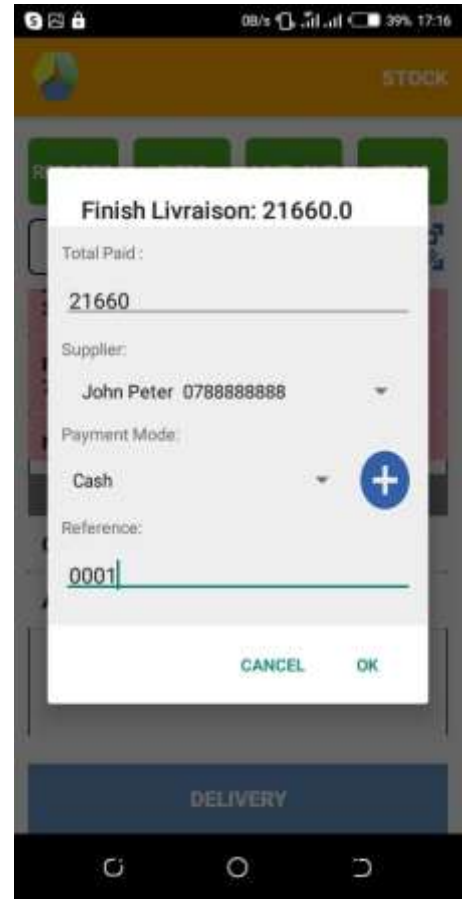

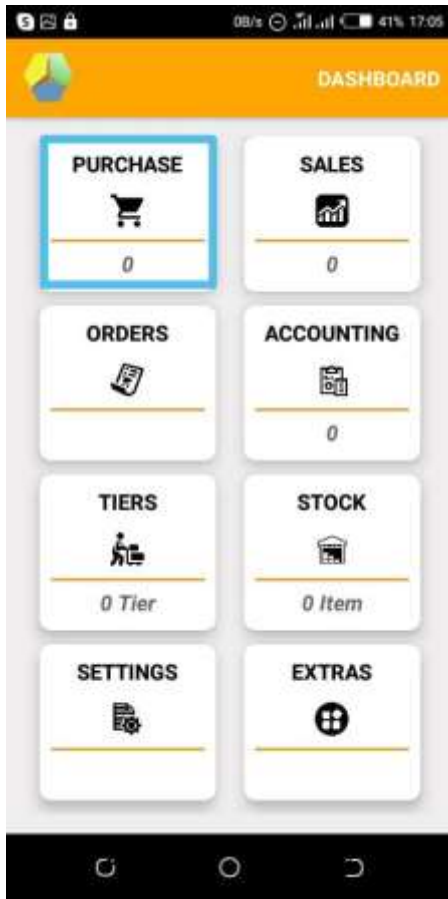

PURCHASE

Whenever a client has purchased some items and has physical stocks/he will need to add it in the system in order to be able to make digital transactions and issue an invoice. Below are the steps to follow:

STEPS

1. Login in the App → Main Page
2. Open purchase button → purchase
3. Select different items you want to add in the system with the quantity in details
4. Click on DELIVERY button
5. Fill the information requested as below
6. Click done
7. Select NO CHANGE to keep the selling price or MANUAL PRICE if you want to change the price
8. Then click OK to add the stock in the system, a purchase not will be printed

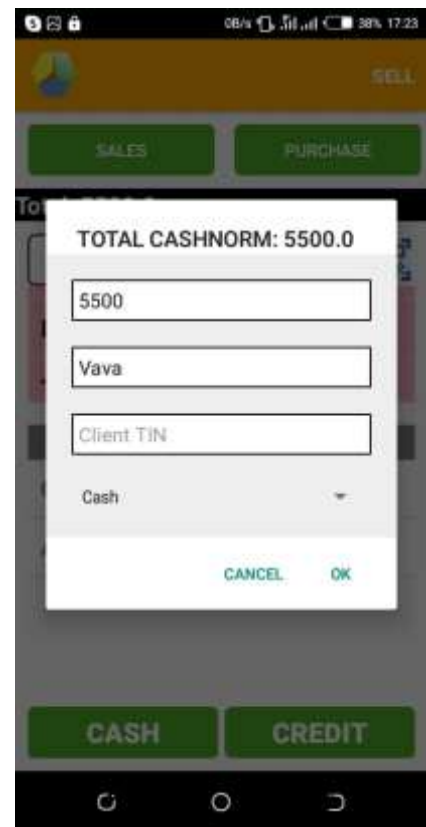

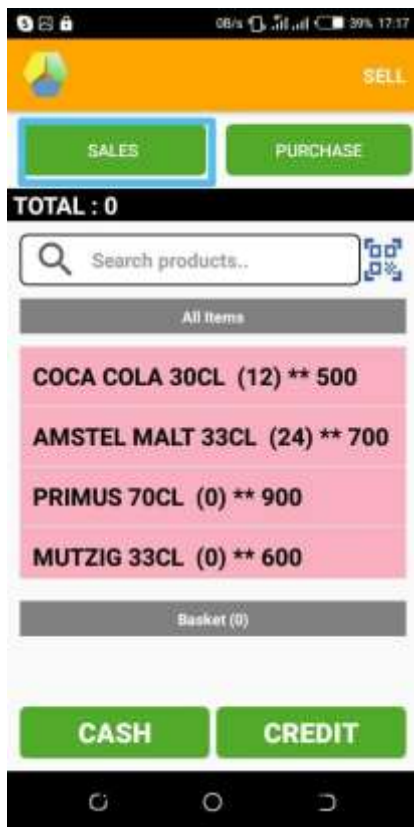

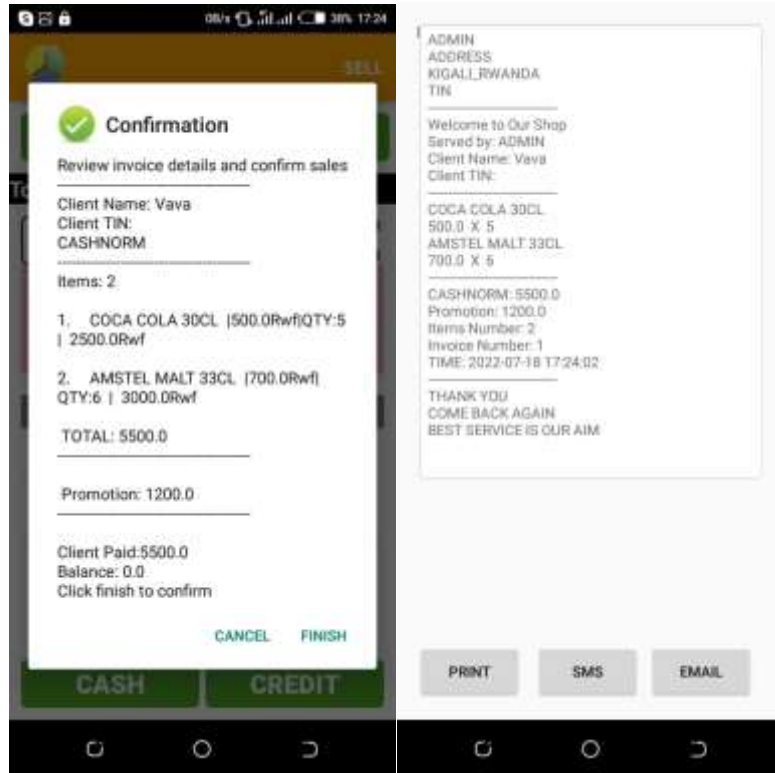

SELL

Once the stock of the products has been entered in the system, the user can start selling and give invoices to the customers. There are two different ways of selling products, by scanning in case the product has a barcode and by searching. Below are the steps to follow:

STEPS

1. Login in the App → Main Page
2. Open Sales/Purchase button → open sell button
3. Choose item to sell by searching them or scan that certain product
4. Items will be added in the BASKET under the Items list
5. Click CASH and fill the form given as below
6. Click OK and FINISH to approve the transaction
7. Then print the invoice.

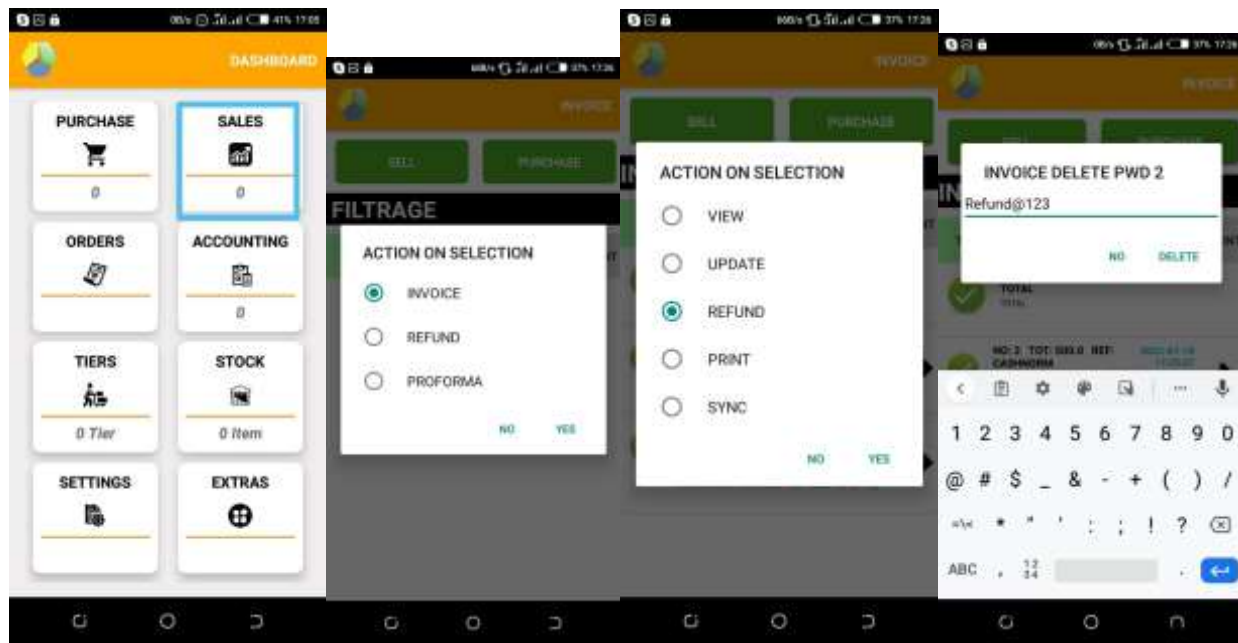

REFUND

There are times where there could be a mistake in making invoices or the clients return the items they bought. In this case, there is an option of making a refund and the item quantity gets restored in the system. Refunding steps are as follows.

STEPS

1. Login in the App → Main Page
2. Open SALES button
3. Choose the invoice to refund
4. Choose action to do (REFUND)
5. Enter refunding password, by default it is **Refund@123**
6. Click ok to refund the invoice

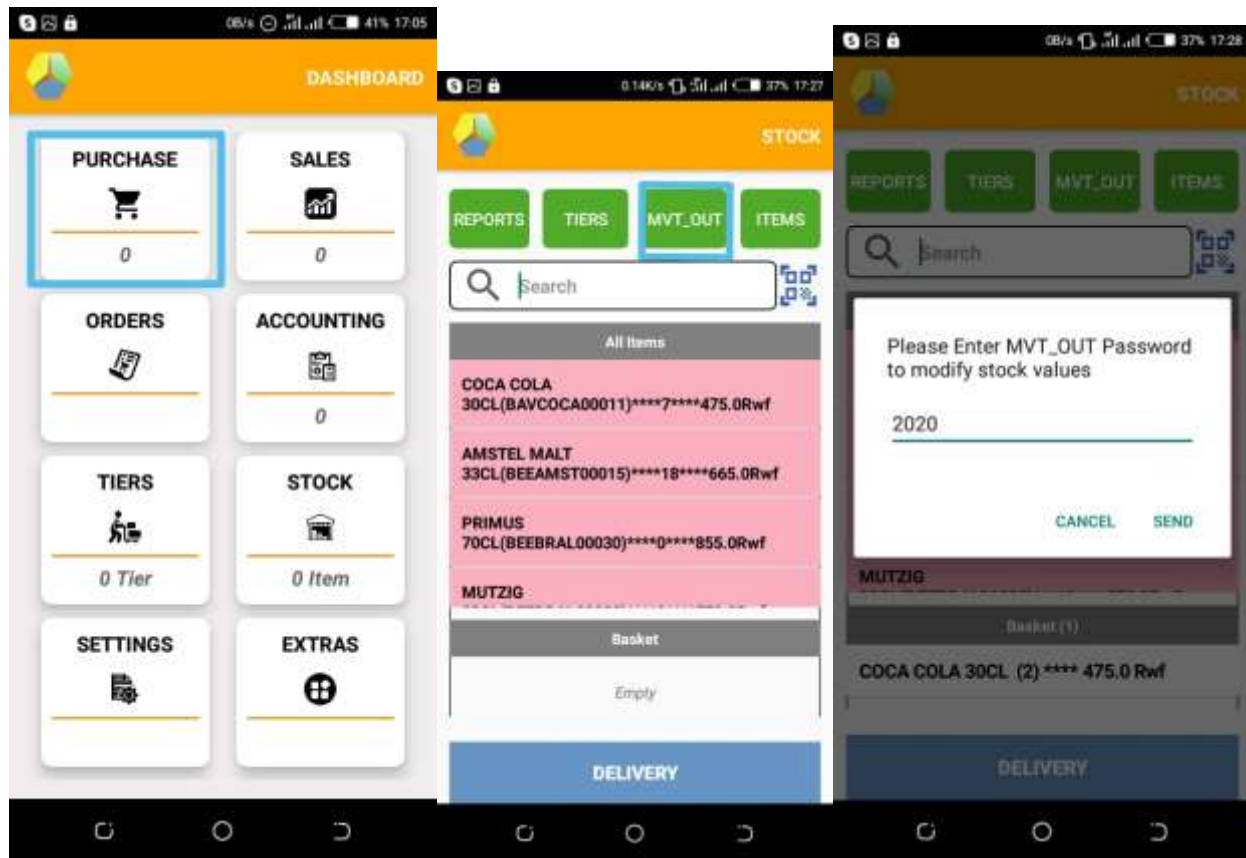

MOVEMENT OUT (MVT_OUT)

Not all items get out of stock by being sold. There are items which expire; which are broken; or they are stolen. So, in order to have a Physical stock which is equal to stock in the system, we have to make movement out. Below are the steps for making movement out (MVT_OUT)

STEPS

1. Login in the App → Main Page
2. Open purchase button → purchase
3. Select different items you want to remove in the system with the quantity to add in the BASKET
4. Click on MVT_OUT to remove the stock
5. Fill the form as below
6. Confirm

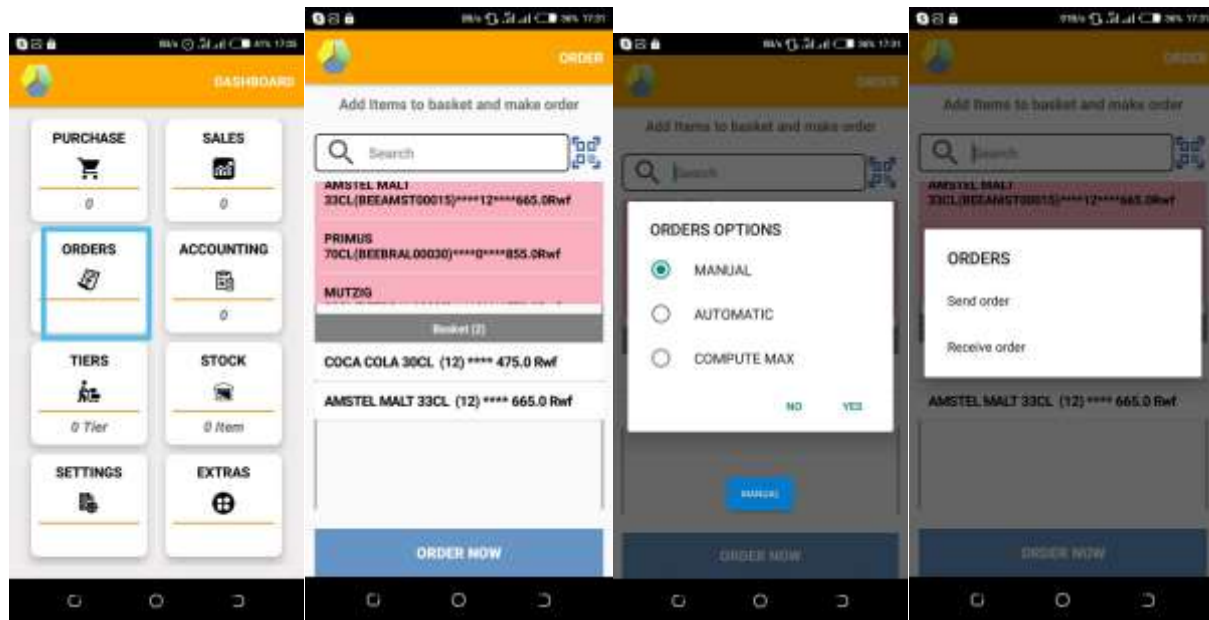

ORDERS

On the distribution side, the Shops can order products to the supplier through the system. Orders can be made with the following steps

STEPS

1. Login in the App → Main Page
2. Open ORDERS button
3. Select different items you want to order with the quantity and will be added in the basket
4. Select order and this interface will be prompted
5. Choose MANUAL orders
6. Fill the form as follow
7. Then Send order

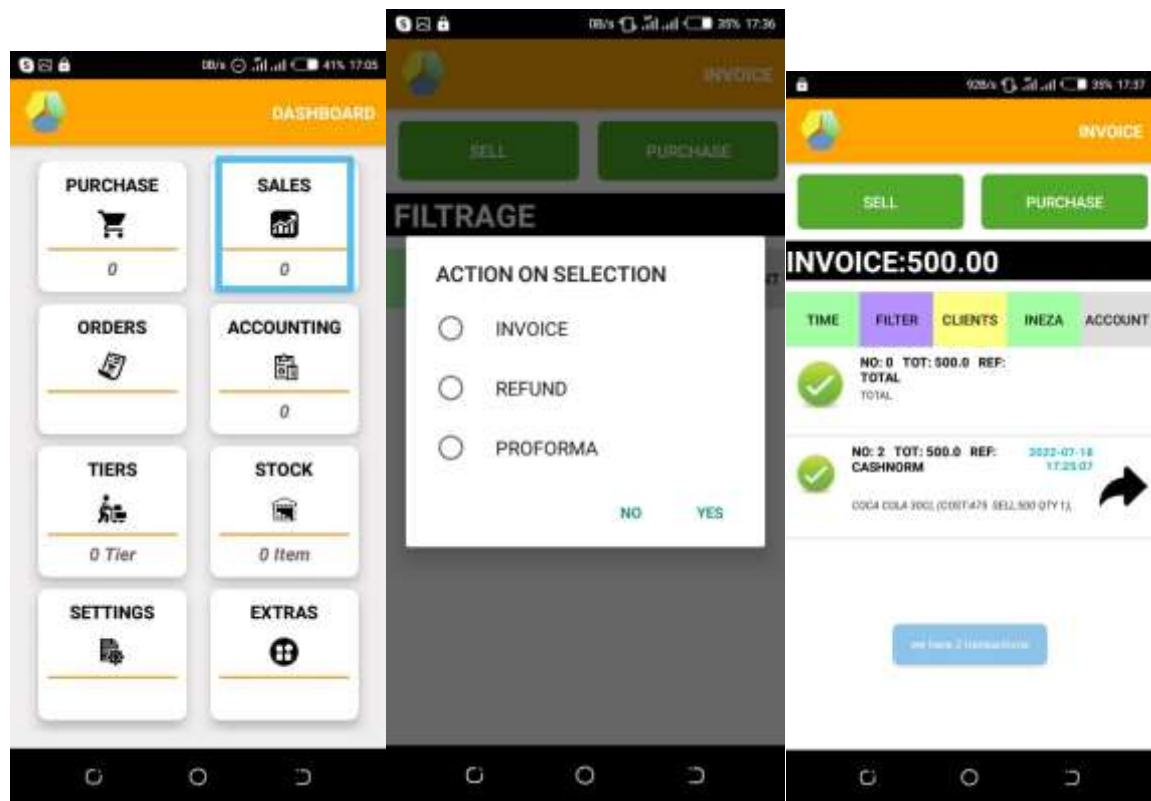

REPORTS

Within this section, a user can view different reports as in SALES, PURCHASES or REFUND by sorting a desired time. Below are the steps to follow to get those reports.

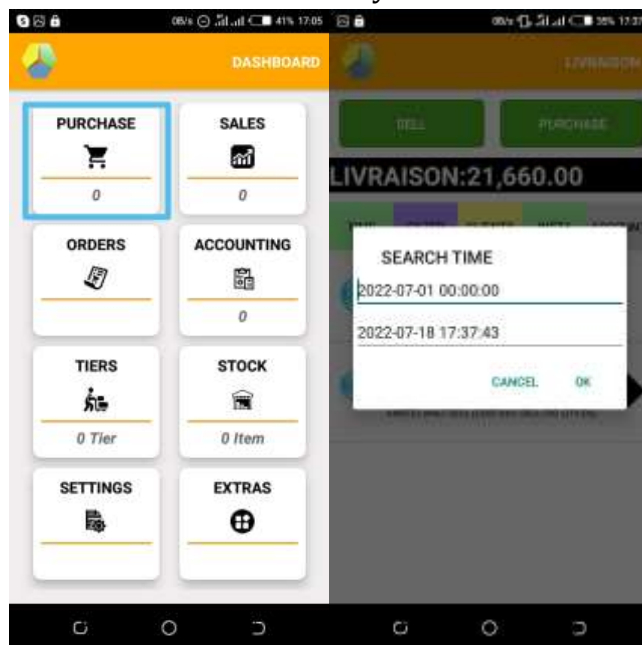

STEPS FOR SALES/REFUND REPORTS

1. Login in the App → Main Page
2. Open SALES button
3. Choose a report to view (invoice or refund)
4. Then filter or sort by time to access the needed report

STEPS FOR PURCHASE REPORT

1. Login in the App → Main Page
2. Open PURCHASE button
3. Then filter or sort by time to access the needed report

ADDITIONAL

To add on the steps above, both invoices, refunds, purchases can all be reprinted by clicking on once and get this interface.
